My portfolio

ABOUT ME

Computer Science student at Universitas Negeri Semarang with a strong focus on Fullstack and Backend Development, particularly in building scalable systems and implementing logical architectures. Experienced in developing and maintaining web platforms during a Web Developer internship at Diskominfo Kota Semarang. Completed a Web Development bootcamp by Dicoding, with exposure to modern technologies and industry best practices. Passionate about backend development for its technical depth, performance optimization, and structured problem-solving approach.

PROJECT EXPERIENCES

News Portal – Frontend Developer

Aug 2025

- Developed with React and Vite, ensuring fast performance and a modern development workflow.
- Implemented as a Single Page Application (SPA) for smooth navigation and responsive user experience.
- Fetches news data from a custom backend API service that securely manages API Keys and aggregates multiple news sources.

News Portal – Backend Developer

Aug 2025

- Built with Node.js and designed as a REST API service.
- Fetches and aggregates news data from four different APIs: NewsAPI, TheNewsAPI, GNewsAPI, and NewsData.io.
- Handles all API requests on the server side to keep API Keys secure and hidden from the client..
- Deployed on Railway, providing reliable hosting and seamless integration with the frontend application..
- Designed with a modular and maintainable architecture, enabling easier future feature expansion and system scaling.

Maniy – Frontend Developer

Jun 2025

- Developed with React and Vite to ensure fast performance and a modern development workflow.
- Structured as a Single Page Application (SPA) with Progressive Web App (PWA) features, providing smooth navigation, offline access, and installability across devices.
- Features a responsive and accessible user interface, delivering a seamless experience for managing personal finances online.

Maniy – Backend Developer

Jun 2025

- Developed with NestJS and GraphQL, providing a robust backend architecture and efficient query handling.
- Implements JWT authentication and OAuth integration for secure user access, with MongoDB as the primary database for centralized financial records management.
- Enhances scalability and reliability through RabbitMQ for message brokering, Redis for caching, and Docker for containerized deployment.
- Ensures code quality with automated testing using Jest, maintaining performance and stability.
- Designed with a modular and maintainable architecture, enabling easier future feature expansion and system scaling.

Tanam AI – Frontend Developer

May 2025

- Developed a responsive single-page application using HTML, CSS, and vanilla JavaScript, reducing page load time by 30% without relying on frontend frameworks.
- Implemented the Model-View-Presenter (MVP) pattern to separate UI and logic layers, improving maintainability and code clarity.
- Integrated external REST APIs and applied accessibility best practices, including view transition effects and offline-first capabilities using service workers.

Tanam AI – Backend Developer

May 2025

- Independently engineered a scalable backend system from scratch using Node.js and Hapi.js, handling all aspects including routing, input validation, and custom error handling to deliver a seamless and reliable API experience.
- Integrated a TensorFlow-based machine learning model into the backend, enabling real-time prediction of plant diseases with over 90% accuracy.
- Deployed the backend to Railway with full environment setup (CORS, .env, HTTPS), ensuring stable communication between client and server services.

Guardian Forest – Game Developer

Aug 2024

- Built an adventure-puzzle game using Godot Engine and GDScript, featuring A* pathfinding for intelligent enemy navigation.
- Structured game logic with MVC architecture and Scriptable Objects, enhancing modularity and scalability across multiple scenes.
- Optimized performance and animation flow using Tween nodes, resulting in smoother transitions and responsive gameplay aligned with competition standards.

WORK EXPERIENCES

Diskominfo Kota Semarang – Web Developer Intern

Mar 2025 - Jul 2025

- Supported the development and maintenance of an official government website to deliver public information transparently and in a structured manner.
- Implemented UI/UX elements using HTML, CSS, and JavaScript to enhance the accessibility of digital services for the public.
- Contributed to internal information system management and assisted the IT team in content updates, debugging, and technical documentation in accordance with government standards.

EDUCATION

Universitas Negeri Semarang, GPA: 3.46

August 2022 - Present

Bachelor's Degree in Informatics Engineering

- Built a face recognition system using the DeepFace framework, implementing real-time identity verification through a webcam interface.
- Developed a simple website and integrated it with a MySQL database using XAMPP for local server management and testing.
- Created an IoT-based project to control a traditional electric fan via smartphone using Arduino and basic circuit integration, showcasing practical applications of embedded systems.

Coding Camp powered by DBS Foundation

Feb 2025 – Jun 2025

DBS, Dicoding

- Gained comprehensive knowledge of web application development from basic to intermediate levels, covering HTML, CSS, JavaScript (ES6+), and frontend frameworks like React.js to build dynamic and responsive user interfaces.
- Built backend services using Node.js and Express.js, integrated with MongoDB or PostgreSQL databases, and implemented RESTful API concepts to enable communication between frontend and backend.
- Completed a final fullstack web application project featuring authentication, data management (CRUD), and deployment to hosting platforms, while applying version control using Git and GitHub in a collaborative workflow.

CERTIFICATION

Belajar Pengembangan Web Intermediate – May 2025

Credential ID: NVP75RRMVXR0

Dicoding Indonesia

Belajar Fundamental Front-End Web Development – Apr 2025

Credential ID: KEXL7WJ80XG2

Dicoding Indonesia

Belajar Dasar Pemrograman JavaScript – Mar 2025

Credential ID: 6RPNRE909X2M

Dicoding Indonesia

Memulai Dasar Pemrograman untuk Menjadi Pengembang Software – Feb 2025

Credential ID: JLX198RRNP72

Dicoding Indonesia

Memulai Pemrograman dengan Java -Jun 2024

Credential ID: L4PQ1EG0VXO1

Dicoding Indonesia

HCIA-AI V3.5 Course – Dec 2024

Credential ID: EBG20241222007526

Huawei

AI Basic: Overview of AI (CRA Training Program) – Dec 2024

Credential ID: ICTCRA20241221007441

Huawei

EXTRA QUALIFICATION

- **Soft Skills:** Public Speaking, Teamwork, Problem Solving, Time Management, Technological Adaptability
- **Hard Skills:** Node.js, Express.js, Nest.js, RESTful API, GraphQL, React.js, Next.js, PHP, Laravel, Python, Java, C, C++, C#, MongoDB, MySQL, Redis, RabbitMQ, JWT, OAuth, HTML, CSS, JavaScript, Three.js, GDScript
- **Language:** Indonesian (Fluent), English (Intermediate)
- **Technical Skills:** Git & GitHub, VS Code, Postman, Figma, Terminal / Command Line, Netlify / Vercel / Railway, Chrome DevTools, NPM, MongoDB, Compass / pgAdmin, ESLint / Prettier.
